Gender, Ethnicity & Race

At Goldman Sachs, we are committed to our policy of equal opportunity in employment and oppose all forms of unlawful discrimination in any jurisdiction in which we operate. We aim to take every possible step to ensure that individuals are treated equally and fairly and that decisions on recruitment are based solely on objective and job-related criteria.

To enable us to evaluate the effectiveness of our equal opportunity policy (and to comply with record keeping and reporting requirements in some jurisdictions), we ask you to provide information on your gender, ethnic origin and military experience. We understand and respect the fact that equal employment monitoring may be unusual in your jurisdiction.

We assure you that the data collected will be used for monitoring and reporting requirement purposes only, and for any purpose for which you provide specific consent, and will not be otherwise disclosed to those responsible for recruitment decisions. The data may be processed in a number of the Goldman Sachs offices and will be communicated to those within Goldman Sachs who are responsible for the collection of statistical data and reporting. Such personnel may be based in countries which may or may not have data protection laws. In submitting the information requested in this section, you consent to the processing and transfer of the information as described above.

Goldman Sachs is an international company skill abreast with top talents across the world providing great value for people and asynchronously providing great opportunities for people in Africa and beyond like me.

I believe that to be the best, you must be with the best, learn from the best and do your best, and that's the reason I want to work for this ingenious institution.

I'm a very passionate individual, child-like passion in Software development & Engineering and ever since I discovered the world of programming in my first year at the university at age 18, I have loved every journey of it though rough sometimes.

Goldman's Sachs is huge and work on many projects creating real value, I want to be a part of that, I want to get up in the morning and go to work every day knowing that I'm going to work with some of the smartest people across the globe creating innovative technology that greatly affects the lives of businesses or people.

I love situations that require me to work outside my comfort and knowledge set, and I'm self-driven to learn all I can lay my hands on when I'm considered as part of the Goldman Sachs family.

Below are a few skills I would like to highlight that will help me contribute to your Engineering Department's bottom line

- Skilled in designing, developing and testing software
- Thorough understanding of data structures and algorithms
- Knowledgeable of back-end development best practices
- Skilled in Relational and NoSQL Databases
- Working knowledge in Version Control Systems

Thanks for your time and consideration.
